

## **CAPTURING ALL YOUR COST DRIVERS IN ONE PLACE IS NO EASY TASK.**

Fluctuating component and commodity costs and multiple currencies only serve to add more complexity to an already dynamic process.

To make matters even more challenging, all this information needs to be delivered to your customers in less time than ever before.

**QSTRAT Costing is a securely integrated cost and quote preparation application. It offers a versatile alternative to costly internally developed, divergent spreadsheet and database quotation systems.**

By capturing all of your companies' financial assumptions at a single source, you can feel confident in the knowledge that all those involved in the process are working from the same set of information.

QSTRAT Costing supports a wide range of methodologies and cost drivers from simple labor burden models to complex Activity Based Cost models.

QSTRAT Costing's consistent, disciplined, and reproducible approach to quote generation will help you understand your costs better and improve the accuracy of your estimates.

### **FEATURES**

- Create detailed BOMs on-the-fly
- Pass detailed costing information to other
- Incorporate a wide variety of methodologies and cost drivers, like ABC Costing or simple labor models
- Export your data in XML for use in other systems and applications
